

Enabling you to see
the world in a better light

The Pioneer in his Craft

Akshar Eye Clinic was established in the year 1989 by Dr. Nitin R. Malkan. Over the years, he has become synonymous with excellence in his professional work and a role model for his colleagues. His skills, passion and experience lay the foundation of this multispecialty eye care hospital. Dr. Malkan was the pioneer of phaco-surgery in the northern suburbs of Mumbai. He constantly keeps pace with the fast evolving ophthalmic science and continues to grow as a surgeon every day. Under his diligence and dedication, Akshar Eye Clinic has grown into an exclusive multispecialty Eye Care Centre in Malad. It spans over 5500 sq. ft. encompassing a dedicated diagnostic zone, with well equipped refraction room, perimetry and topography room, assistant consultant's room, surgeons consulting room and a hi tech conference room.

Dr. Malkan's profound knowledge in his field stems from the numerous International Conferences that he has attended in USA, Singapore, Shanghai, Sri Lanka and Thailand. He also holds to his credit various National Scientific Presentations.

It takes more than just science,
to bring a vision alive and more than
just knowledge to bring to life a dream

Expect nothing less than extraordinary

Akshar Eye Clinic's relationship with success began in the year 1990 when Akshar eye clinic was born by the untiring efforts of Dr. Nitin Malkan along with Mrs. Geeta Malkan as a small two-bedded hospital and a day care centre for ophthalmic practice. Embracing modernization and continuous updating of facilities resulted in its emergence as the best eye care centre in the area. Today the small seeds sown by them, has now grown into a fruitful vision namely Akshar eye clinic and multi-specialty eye care hospital.

The cornerstone of this entire project is Mrs. Geeta Malkan. She has played a pivotal role in giving wings to the dream shared by her and Dr. Malkan. She has nurtured the centre like her own child, giving due attention to the smallest details. The entire project has materialised after due deliberation and conceptualisation. Her detailed planning, meticulous study of the doctor-patient relationship, non-compromising accuracy and consideration for the working staff's comfort has resulted in this multi-specialty eye care hospital where top-notch quality and cleanliness is the norm. Her involvement in the day-to-day activities serves as an assurance of professional management with a human touch.

At Akshar Eye Clinic, we strive to give our patients the best of both worlds: the infrastructure of a big hospital and the comforts of a private one. Our entire centre has been designed keeping in mind the comfort and well-being of our patients.

Our centre comprises of comfortable and homely recovery rooms, state of the art laboratory and a separate operation theatre complex with air locked

lobbies. All the surgeries are assisted by qualified and experienced ophthalmic anaesthetists.

Each subspecialty is attended by the respective

qualified ophthalmic surgeon. Three anterior segment surgeons available round the clock for providing total eye care throughout the day.

Our centre boasts of exclusive micro co-axial phaco emulsification centre, complete high tech Glaucoma Detection centre, Retina clinic, Cornea clinic, Oculoplasty clinic, Paediatric ophthalmology clinic, Ocular pathology department, Uveitis clinic,

Low vision aid centre, Contact Lens Clinic and a dedicated optical outlet.

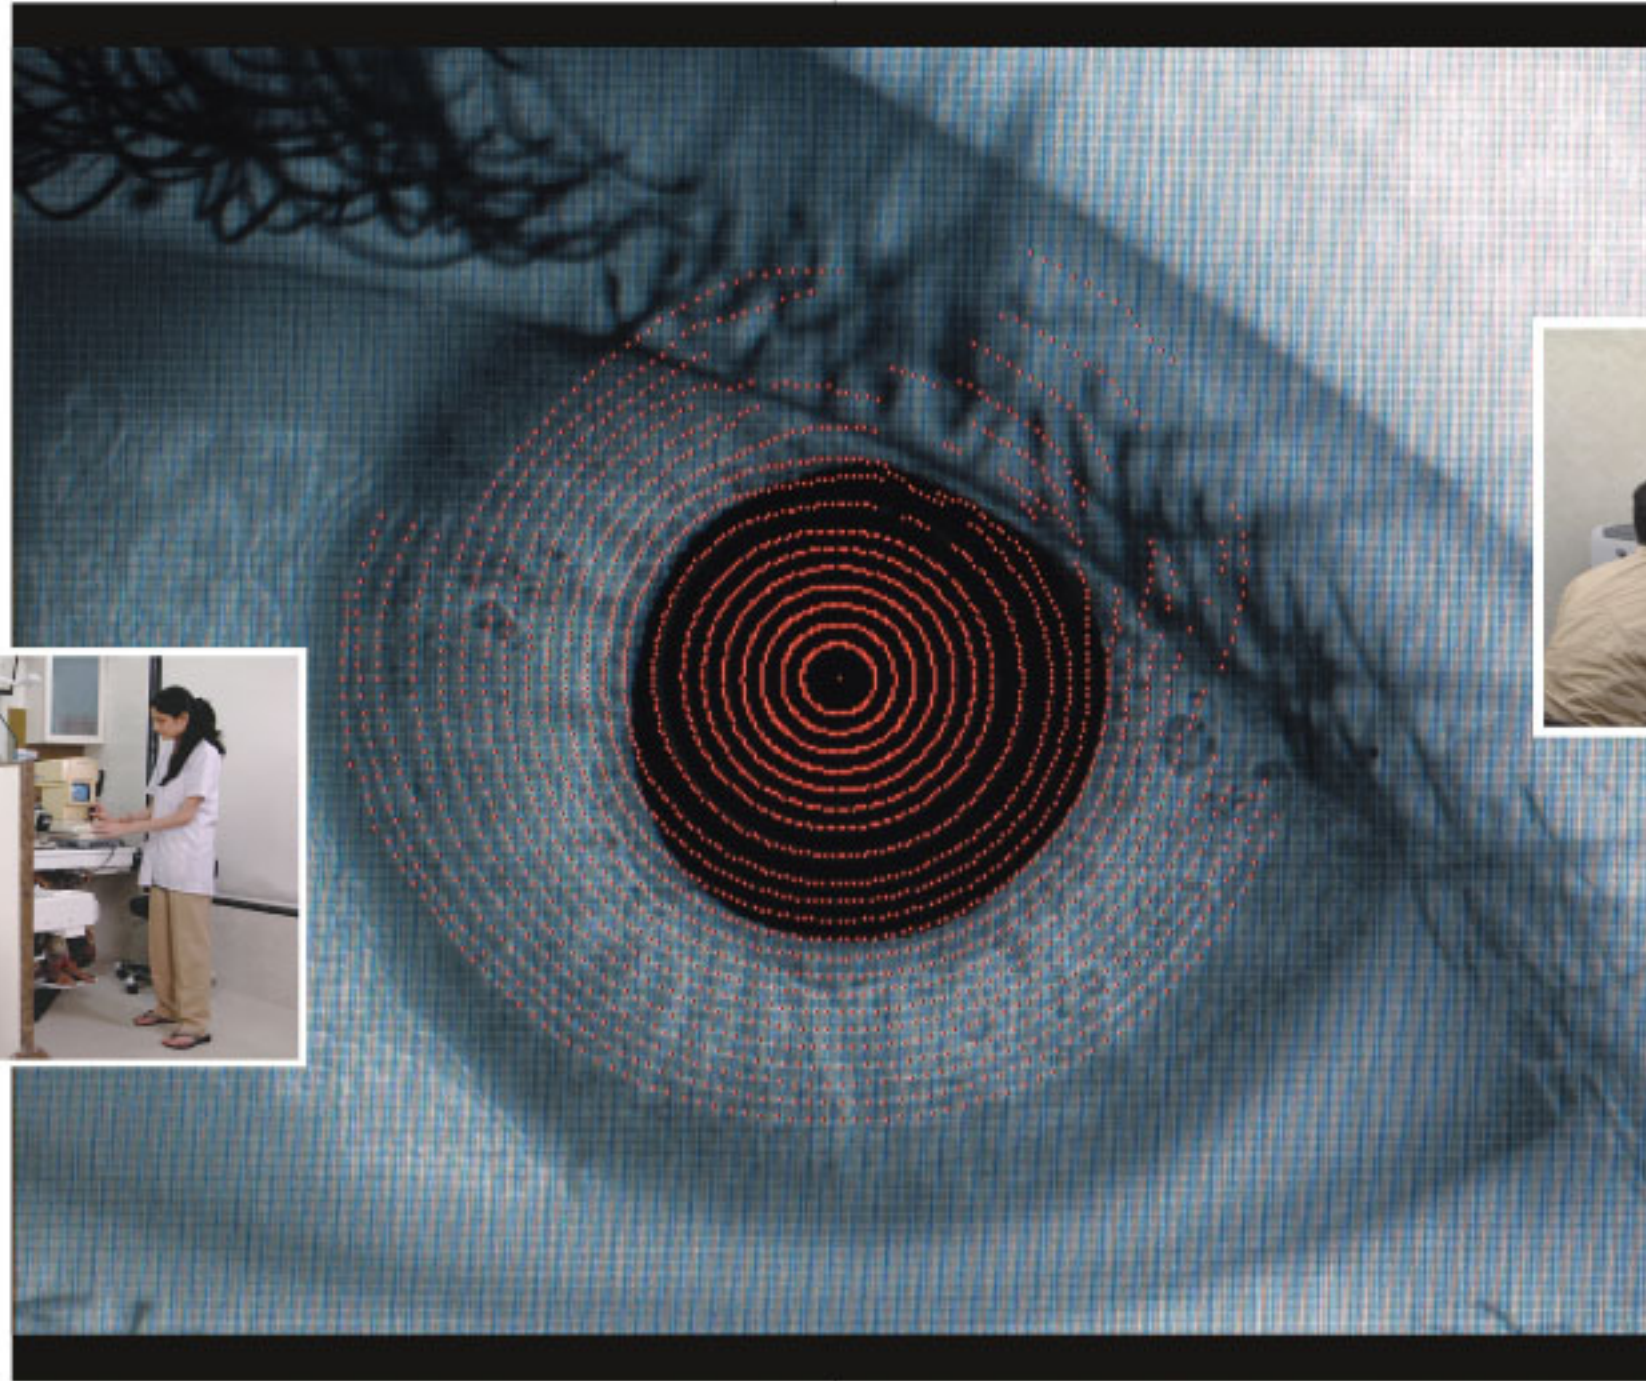

The hospital has a fully computerised working system manned by 25 medical and paramedical staff members who are dedicated, courteous and welcoming. The daily activities of the centre are co-ordinated by a hospital administrator whose excellent hospitality, counselling abilities and management capabilities

maintain a patient friendly environment.

Our patients' comfort and speedy recovery is the best acknowledgement for us.

The master and his instruments of choice

The equipments of a doctor are like the brushes of a painter which enable his skill to manifest. Akshar Eye Clinic is equipped with the latest hi-tech instruments for giving our patients the best.

An epitome of sophistication and hygiene

Creation of an environment to help us serve you better

At Akshar Eye Clinic we have a professionally designed isolated operation theatre complex having three separate operating rooms which is completely air locked and UPS supported.

The operating rooms have complete Epoxy flooring with steel panelled walls and ceiling offering maximum sterile operating conditions constructed with international standards. They are also equipped with modern Ozil Infinity phaco machine, Acurus vitrectomy machine, Lumira zeiss operative microscope, Boyle's apparatus, Pulse oxymeter, etc. keeping in line with our commitment and dedication to quality.

Our emphasis on hygiene and cleanliness is evident from the Hands free knee operated scrubbing, isolated autoclaving area equipped with ETO sterilizer, flash autoclave and steam sterilizer that we have installed. This environment helps our staff to ensure that they maintain a high level of efficiency at all times to help us serve our patients to the best.

Quality begins on the inside

SHREEJI PATHOLOGICAL LABORATORY

Shreeji Path Lab was established way back in 1980 by Mrs. Geeta Malkan, who is the Managing Director of Shreeji Path Lab and Akshar Eye clinic. She has earned her B. Sc, D.M.L.T and L.L.B degrees from Bombay University and since then she has dedicated her expertise to the field of pathology. Her keen eye for detail and perfection has helped Shreeji Path Lab to achieve the highest level of pathology laboratory standards.

The laboratory is the perfect blend of ultra modern instruments and a friendly atmosphere. It has two visiting MD pathologists. It has a lavish blood collection room and is equipped with a

fully automated biochemistry analyser, blood cell counter, coagulometer, ELISA reader, a fully automated immune-assay machine, electrolyte machine, a dedicated microbiology lab. Full time availability of lab technicians is also assured.

The laboratory provides various body profile checkups like executive

profile, cardiac profile, liver profile, kidney profile, preoperative check-up, thyroid panel and anti-natal profile. Blood sample collection can be arranged from patient's residence with a prior appointment. Computer printed reports are hand-delivered or faxed or e-mailed as per patient's convenience.

Laboratory Facilities:

Haematology	Cytology
Clinical Pathology	Fertility & Hormone Evaluation
Biochemistry	Tumor Marker studies
Serology Tests	Infectious Disease Testing
Elisa Tests	Complete Health Checkup
Microbiology	Pre Employment Checkup
Immunopathology	Pre Operative Profile
Histopathology	Antenatal Profile

Live your life without missing out on the finer details

Akshar Eye Clinic also houses an optical shop "Vision Aid" headed by Mr. Gitesh Majlani who, along with being an experienced and qualified optician, is a dedicated Rotarian, a thorough educationalist and is renowned for his honesty and sincerity.

'Satisfaction of customers' is Vision Aid's motto which has also resulted in a unique way of conducting the business. Mr. Majlani has adopted the e-business way of working which has enabled him to provide his excellent services to many clients across various countries, making

him the favoured optician for NRIs and Foreign citizens.

Vision Aid adds to our patients' convenience by ensuring that all their requirements related to their eyes are met under one roof. It has provided decade long services that are appreciated by one and all.

Excellence is not an act, but a habit

The vision of Akshar Eye Clinic would not have become a reality without the support of our entire team. Their hard work and commitment has helped us achieve our current level of perfection.

It is said that "to handle yourself, use your head; to handle others, use your heart." Our staff makes sure that the patients are made to feel at home at our clinic. They are very patient-friendly and welcoming. The comfort of our patients is their priority. Our visiting and permanent staff works in collaboration to ensure that they provide an atmosphere conducive to the speedy recovery of the patients.
